GAS HEATER

COMFORTABLE USE PATIO

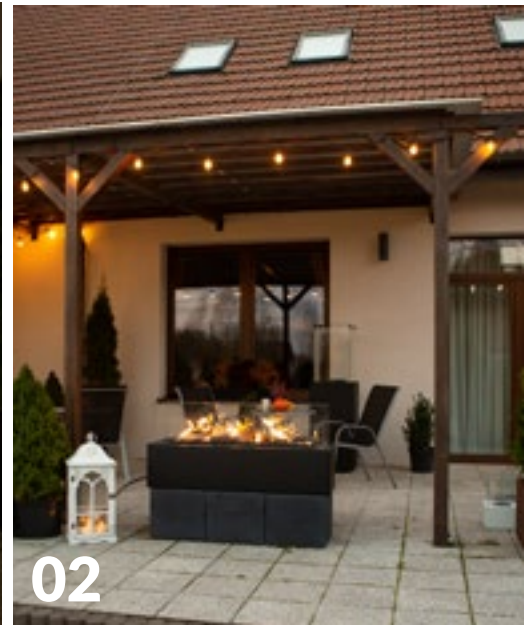

no sound or smell. His action does not affect the air circulation, which is particularly important for users who are allergic. The device can operate at full power continuously for up to 10 hours. Device for cylinder 11 kg. The apparatus is adapted both for propane-butane and pure propane. We recommend the use of pure propane cylinder. PATIO does not require cleaning windows, because they do not fire smoke. Its launch is very easy and intuitive to use.

SAFETY AT THE HIGHEST LEVEL PATIO

is powered by liquid gas cylinder. The lower part of the device housing is made of steel, powder coated. Thanks to this patio is resistant to damage. The device uses glass having a thickness of 4 mm. The lower chamber device is secured against opening by unauthorized persons, which is mounted to the door castle. Additionally evenly directs heat generated in the four directions. PATIO is equipped with a special valve antyprzechyłowy that in the event of overturning unit automatically shuts off the gas supply to the controller, which extinguishes the fire. The device is not dependent on the electrical system, so we are sure that even in the event of a power failure, will be lit terrace or garden. With built-in driver, we can protect the device against unauthorized switching on him by his children, or design turn on or off at a particular time, a particular day. PATIO additionally equipped with a thermocouple sensor which, when the burner flame to blow away the control shuts off the gas supply to the burner

CONVENIENT USE

PATIO does not emit any sounds or smell. Its activity does not influence on air circulation, what is particularly essential for allergic users.

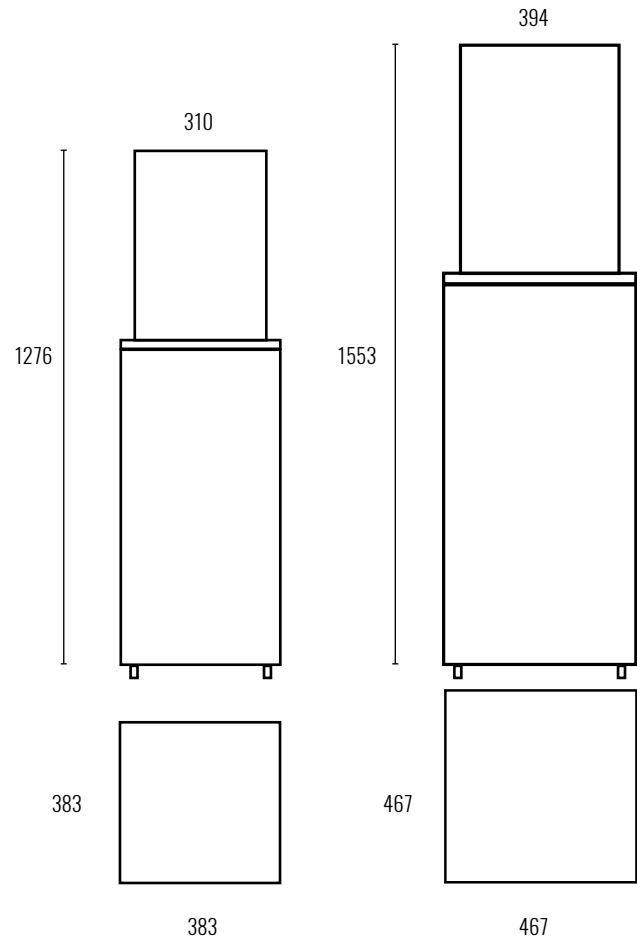

It is easy to move and place in chosen area due to equipped wheels. When we settle it at the target point, we can lock the wheels and place the legs in its place.

The device can work constantly with full power, continually up to 30 hours.

PATIO does not require glass cleaning, since fire does not smoke to chem. Its start up is very easy and intuitive due to simple in use remote control.

MERTIK MAXITROL CONTROL

The solution we used is a proven system. It provides us with confidence and reliability, and at the same time gives us unlimited control possibilities.

Sierra
BUILT-IN GAS HEATER

MODERN DESIGN

The simple form of the SIERRA casing with the AQF 02 gas furnace fits perfectly into the modern style.

Solid construction made of steel, painted with high quality powder paints in black matt.

The fire visible from three sides will not go unnoticed during meetings with family and friends.

Thanks to the garden fireplace we will quickly, comfortably and safely create a fairy-tale atmosphere in the garden, patio or on the terrace.

Optionally, decorative elements, such as wood or GLOW FLAME embers, can be purchased.

Glazing, which can also be purchased as an option, restricts the access directly to the fireplace, as well as works well as a decorative element of the building finish.

AQF/02/SIERRA

414,63 €

COMFORTABLE USE

It takes a few seconds to light up the heater. It is extremely comfortable and intuitive at the touch of a button. It is also possible to manually adjust the flame height.

The device can operate at full power, continuously up to 13 hours. It is powered by an 11 kg cylinder. It is suitable for both propane-butane gas and pure propane. We recommend using a cylinder with pure propane.

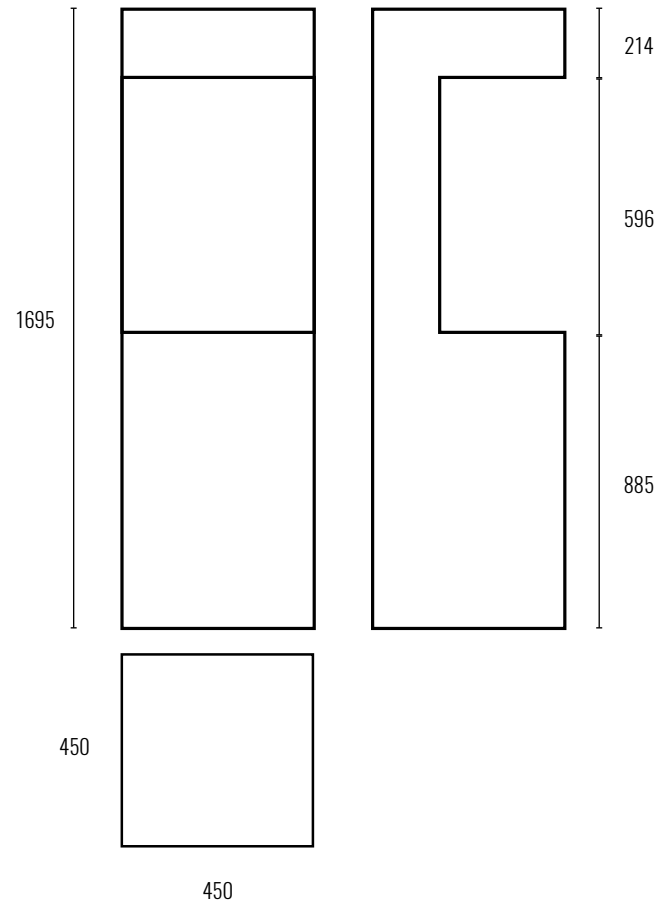

In the lower part of the casing there is a closed chamber in which we place the gas cylinder. The opening of the door is based on the push to open system, which does not require an additional handle.

Thanks to adjustable feet it is possible to level the heater.

FOR THE SAKE OF SAFETY

The furnace does not emit sparks or smoke. The device is equipped with a tilt valve which automatically cuts off the gas supply to the controller in case of tipping over, extinguishing the flame. An additional protection is a thermocouple sensor, which cuts off the gas supply to the burner if the control burner flame is blown out.

The AQF furnace is equipped with a completely safe, manual gas control system, which prevents uncontrolled fuel leakage.

Rated output (kW)	3.7 - 11.5	Weight (kg)	63
Heating power range (kW)	11,5	Type of fuel	propane-butane gas
